PROJECTS

NeuroDiary — A Personal NeuroDiary for Mental Health.

Created a calming, user-friendly app to track moods and emotional well-being.

- Custom journaling interface built with React, focusing on simplicity and accessibility for daily entries.
- Integrated sentiment analysis and visual mood tracking using charts for self-reflection and mental well-being.
- Mobile-first design with secure login, ensuring privacy and encouraging consistent mental health check-ins.

Prescripto — Doctor Appointment for Medical Checkup

Built a fast, reliable platform for booking medical appointments online.

- Clean UX in React and Node.js with role-based dashboards for doctors and patients.
- Integrated calendar syncing, real-time slot availability, and automated appointment reminders via email/SMS.
- Optimized for speed, accessibility, and HIPAA-inspired data protection standards.

HeavenHub — Property Listing Web Application

Developed a clean, modern site for real estate rentals and sales.

- Custom frontend using ReactJS for dynamic listing views, filters by price/location/type, and responsive design.
- Implemented SEO-friendly meta tags, structured schema markup, and fast-loading architecture for enhanced discoverability.
- Implemented clean UI components for listing previews, property detail pages, and quick inquiry forms.

EDUCATION

International Islamic University, Islamabad

Bachelor of Computer Science

- Final Year Project: NeuryDiary – A Personal NeuroDiary for Mental Health.
- Focus Areas: Web Development, Machine Learning, Software Engineering.
- Explored UX principles, responsive design, and web performance optimization throughout academic journey
